

DOCUMENT OUTSTANDING POINTS WEB TRAINING

Below are the pending points discussed at the ANAPAT Training Web meeting held on 04/03/2022.

WE AGREED WITH THE USERS:

- ADMINISTRATOR (acasado)
- TRAINING OFFICER (taller@plataformaselevadoras.net)

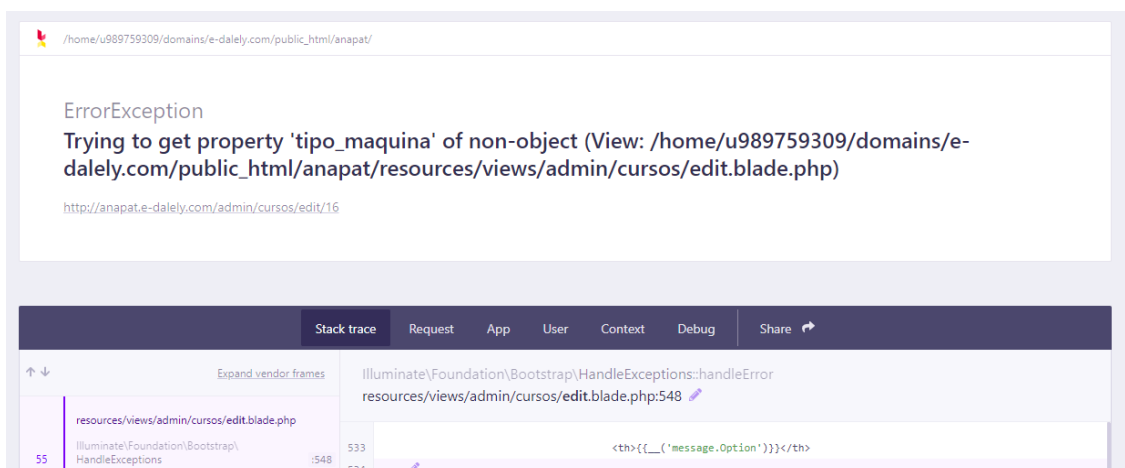

It is very important to be able to import and download the certificates: to know if all the documents are uploaded and to see it at once, not having to go through the documents one by one (as you can see on the current page).

Remove in general in all the options, the texts "select file" " no file selected"... because it is already understood that it is to upload documentation (all the training entities have been working the old web for years) and as every time you access a profile, it comes out even if there is an uploaded file... it is misleading:

Nombre <input type="text" value="Nombre del formador"/>	DNI <input type="text" value="Documento identificación"/>	DNI <input type="text" value="Seleccionar archivo"/> <input type="text" value="Ningún arc...eleccionado"/>
Operador pdf <input type="text" value="Seleccionar archivo"/> <input type="text" value="Ningún arc...eleccionado"/>	Cert Empresa PDF <div style="text-align: center;">  </div> <input type="text" value="Seleccionar archivo"/> <input type="text" value="Ningún arc...eleccionado"/>	Vida Laboral PDF <input type="text" value="Seleccionar archivo"/> <input type="text" value="Ningún arc...eleccionado"/>
PRL <input type="text"/>	PEMP <input type="text"/>	CAP <input type="text"/>

Whether you are reviewing an Operator or a Training Entity, you need to be able to see if there is a missing document to be uploaded. That is to say, if you have to click on the "eye" to see whether or not a document has been uploaded, it is a step backwards compared to the current website. In the old one, which we can see, when you enter any one of them, you see the PDFs and the names of the uploaded files without having to enter, and you see them all at the same time.

- **Courses:**
 - Course 220001: Error when editing the course.

Add "Export certificates" in the Administrator role, to prepare the cards.

- Trainers:

- The documents uploaded in the trainer's profile are not displayed. The built-in view button is not valid, we want to be able to view them directly in the profile, without having to check one by one to see if the documents are uploaded.
- In the Trainer's Working Life, the DNI is displayed.
- The documents corresponding to the Company Certificate and the Operator's Card are not uploaded.
- It does not allow re-uploading a new document, if another document has been uploaded previously.

- Timetable:

- Course number is not fully displayed:

- The theory does not go with the machines the theory is for the whole course. The timetable for the Theory part of the course must be unique, regardless of the type of machinery taught in the Practical part.
- And then, it must be possible to assign to each type of machine, its timetable. Example. In the course 220005, as there are 2 machines (3a and 3b), it must be possible to indicate the timetables of each type of machine that already appear by default because we are in the course 220005.

- List of Attendees:

- In the autocomplete pdf display of the Attendee List, put the name of the Trainer to the left, together with the field that defines him/her.
- In the autocomplete pdf display of the List of Assistants, leave the fields corresponding to the Signature of each of the Assistants empty. Numbers are currently displayed.

- Attendees:

- Error adding Attendees in course 220050.

- I have tried again myself... and now it seems that yes, did get an error like the one in course 220001 above.

- **Card:**

- In the MEWP type section, enter four fields.
- The corresponding Course must be included in the Carnet. The fields "Date of Issue" and "Expiration Date" (instead of the current "Date of Registration" and "Date of Issue") must be included.
- Only inactive Operators should be selectable in the Carnet.
- The Carnet must be a query of all the attendances to the Operator's Course/s, and all the fields must be entered automatically. It must be filled in with the details of the courses attended.
- If the Operator already has a Card previously, and another one is generated (due to a machine addition or a renewal), the Card number associated to that Operator must also be automatically included, without the need to enter it manually. Otherwise, if a new Carnet is generated for that Operator, obviously the field corresponding to the Carnet number must be empty.
- The export to Excel of the Cards/Certificates must be a query as set out on page 33 of the Functional Requirements Document of the Training Web.
- This is how the table should look like, with 4 lines (per machine type):

Ha completado satisfactoriamente el curso de Operador de Plataformas Elevadoras Móviles de Personal (PEMP) en los Tipos:

CÓDIGO DE CURSO	Tipo	Válido desde	Válido hasta
	1b - Estática de brazo	02/03/2022	02/03/2027
	3a - Móvil vertical	02/03/2022	02/03/2027
	3b - Móvil de brazo	02/03/2022	02/03/2027

Demostrando los conocimientos y habilidades requeridos por ambas normas.

the example of the timetable view:

3a - Móvil vertical
3b - Móvil de brazo
Tipo de Curso:
Básico
Publico:
Horarios:

	Contenido	Fecha Inicio	Fecha Fin
Horario	Teoría	08/03/2013 - 08:00	08/03/2013 - 12:30
Horario	3a - Móvil vertical	08/03/2013 - 12:30	08/03/2013 - 14:30
Horario	3b - Móvil de brazo	08/03/2013 - 14:30	08/03/2013 - 16:30
